

TECHFORWARD>>> CONFERENCE

Sponsorship Packet 2025

NASHVILLE, TN
SEPT. 8 - 10, 2025

About the Conference:

Welcome to Tech Forward, a two-day conference that immerses nonprofits in meaningful conversation about how technology can move the sector forward – bringing efficiencies to organizations, building deeper relationships with constituents and making greater impact in the world. Tech Forward brings a larger conversation to our sector, one that looks past methodical day-to-day IT and towards mission-focused, transformative applications of technology. Together with nonprofit leaders, visionaries, and supporting organizations, Tech Forward is a place to share ideas, connect and learn from each other and realize the impact technology can have on how we work as mission-focused organizations and our collective goal of making the world a better place.

About Partnerships and Sponsorships:

Conference partners and sponsors will generate visibility and awareness for their brands among hundreds of technology-interested nonprofits, and have the opportunity to meet with Executives, CIOs, and IT Directors convening to be inspired by innovative technology and work in the sector. Tech Forward uniquely attracts high-level decisionmakers in small to medium nonprofits spanning sectors and location. With a limited number of sponsoring organizations and no exhibit hall or paid vendor marketing, Tech Forward allows for high visibility promotion without getting lost in a sea of sponsors. Help curate conference content, direct its focus and help nonprofits across the country use technology to advance their mission.

2024 Tech Forward Attendees At-a-Glance:
