

## **Data Storytelling**

Metrics to Mission October 1, 2024

### Alyssa Ford

Chief Operating Officer, Tech Impact

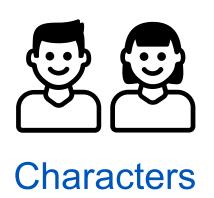

### Agenda

- 1. Why Storytelling
- 2. Impact, Outcomes, Outputs
- 3. Work Backwards
- 4. Build the Story
- 5. Identify the Audience

### Data stories are just... stories

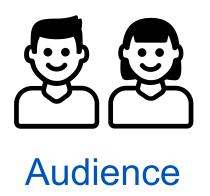

### Data stories are just... stories

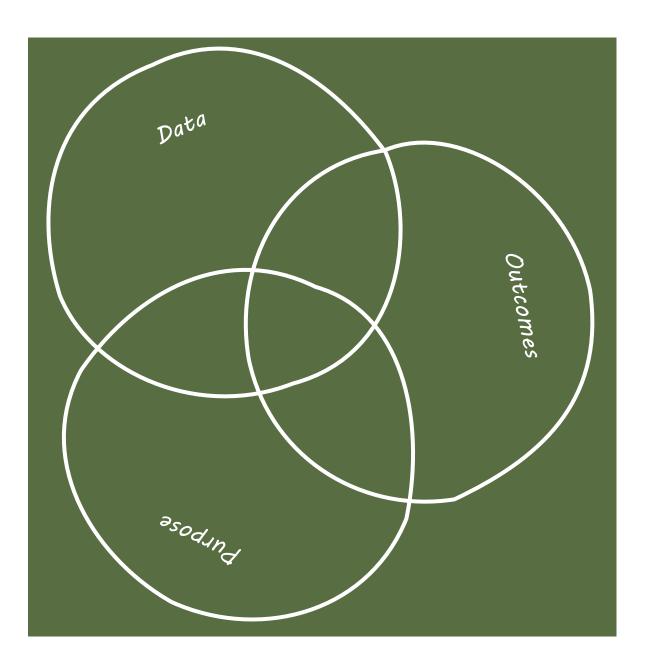

# Why Storytelling

#### **Mission-Driven Narrative**

Connect data, actions, and outcomes, with purpose and impact

Resonate with your audience

Show how your work aligns with your mission and values

Can be a long process

### **Communicate Impact**

Cut through the noise, show results

Highlight the achievements

Use data and metrics to illustrate your impact

# Outputs, Outcomes, Impact

### **Definitions and Differences**

#### **Outputs**

Tangible, KPIs

Easy to measure

Consist of what was done

**Immediate** 

Months (short-term)

Years (long-term)

#### **Definitions and Differences**

**Outputs Outcomes** 

Tangible, KPIs Specific changes

Easy to measure Create change

Consist of what was done

The effect the outputs made

**Immediate** 

Months (short-term)

Years (long-term)

### **Definitions and Differences**

Outputs	Outcomes	Impact
Tangible, KPIs	Specific changes	Cumulative, transformative changes
Easy to measure	Create change	Difficult to measure directly
Consist of what was done	The effect the outputs made	Years of outcomes create lasting change

Immediate Months Years (short-term) (long-term)

### For Example

Outputs what was done?	Outcomes what difference did we make?	Impact what lasting change occurred
# of workshops, training	Improved job skills	Decreased unemployment because of sustained training

Immediate

Months (short-term)

Years (long-term)

### For Example

Outputs what was done?	Outcomes what difference did we make?	Impact what lasting change occurred
# of workshops, training	Improved job skills	Decreased unemployment because of sustained training
# of meals served, pounds distributed	Food resources become available	Improved health with ongoing access to food

Immediate Months Years (short-term) (long-term)

### Work Backwards

### **Mission to Outputs**

Start with the end in mind

Identify what you want to achieve

Break it down into smaller steps

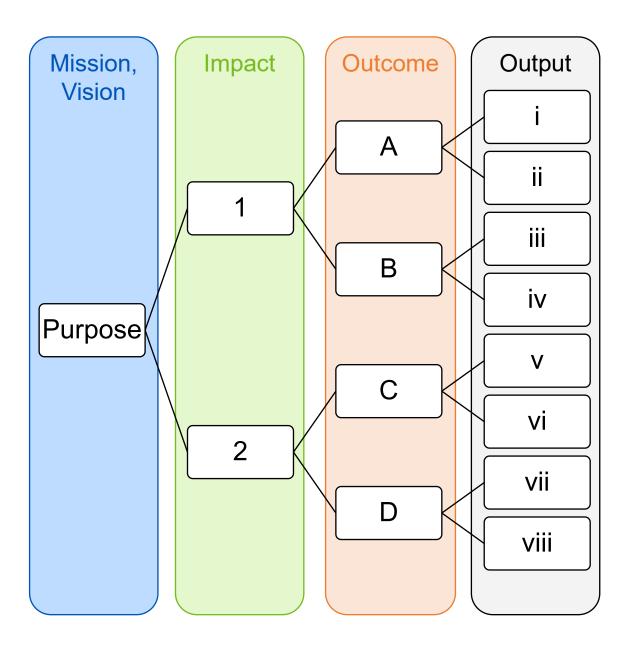

Outcomes

Outcomes

Impact

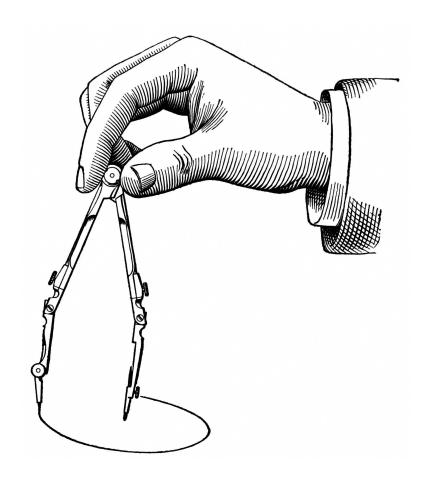

### **Mission to Output**

Start with the mission and the desired impact Break down impact into short-term outcomes Identify the outputs you need to create to achieve the outcomes

\*Make sure everything aligns with your mission

#### **Create a Measurement Plan**

Identify the metrics you need to track

Make sure the metrics align with your mission

Consider:

Outputs

**Data Sources** 

Resources (tools, human, budget)

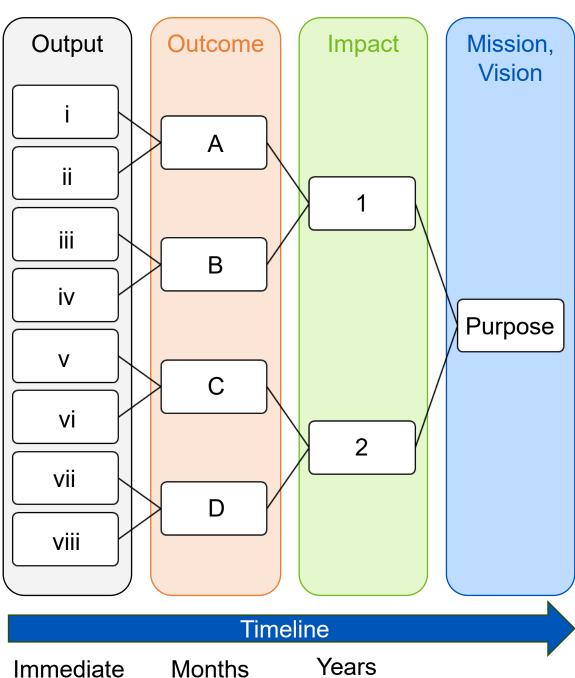

**Timeline** 

# **Build the Story**

#### **Measurement Plan**

### **Build the story**

From data to story

Use the measurement plan as a blueprint

Highlight change over time – outputs lead to real change

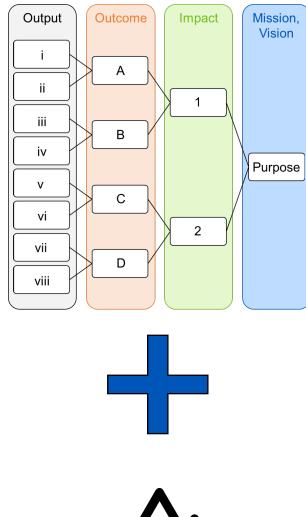

### **Frame the Narrative**

Start with the mission

Add the 'why' behind the work

#### **Add Context**

Create a story that people can relate to Simplify complex data

Use data to illustrate the story: Start big and drill down

Data can update automatically, but the narrative can't...as easily

# Identify the Audience

### **Identify the Audience**

Who are the stakeholders?

Identify what's important to each stakeholder

Understand their perspective

Tailor the story to the stakeholder

### **Understand the Audience**

Who are you speaking to?

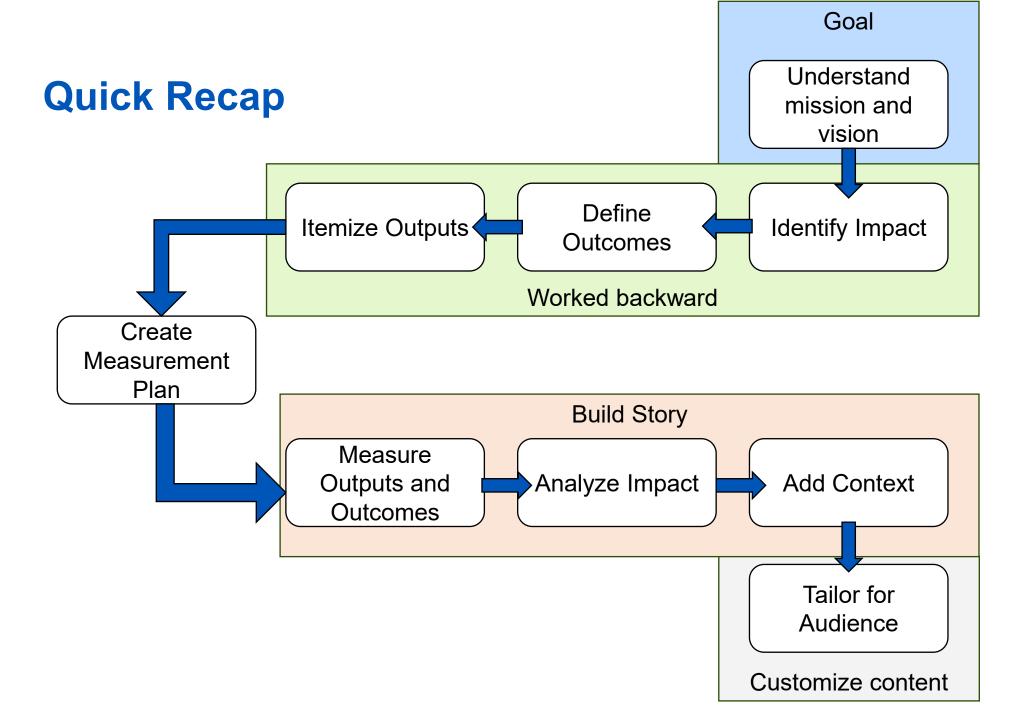

Internal vs. External?

Informed vs. Novice?

What do they care about?

### **EXAMPLE**

**Wilmington Alliance** 

# Thank You
