

Conference Sponsorship

Tech Forward brings together nonprofits IT leaders for two days of inspiring content focused on how next-level technology can drive impact and strengthen missions. The conference goes beyond basic IT tasks to highlight bold, innovative approaches that move the sector forward. It's a space where nonprofit leaders connect, share, and learn from each other.

Conference sponsors have a unique opportunity to reach nonprofit decision-makers in an intimate, high-engagement environment. With an intentionally limited number of slots, sponsors are able stand out, shape meaningful content, and support sector-wide advancement.

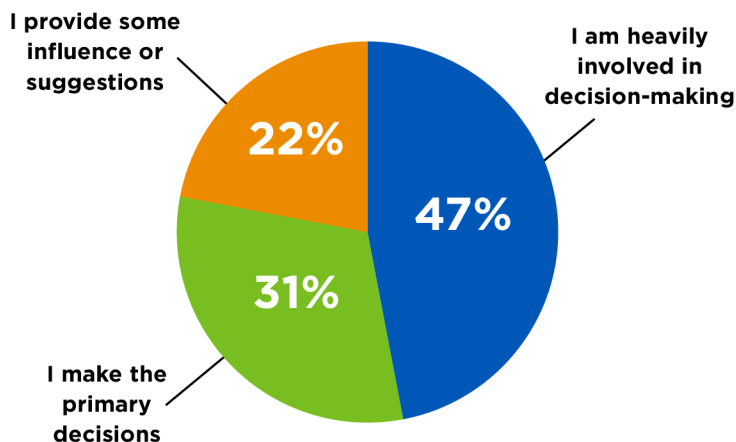

“ I was **pleasantly surprised** at how much was packed into such a short amount of time and **the knowledge I obtained**. I hope to be able to attend again next year. ”

“ I looked forward to every session and event, **everything was thoughtfully curated**, and applicable to a broad audience while still being **relevant**. ”

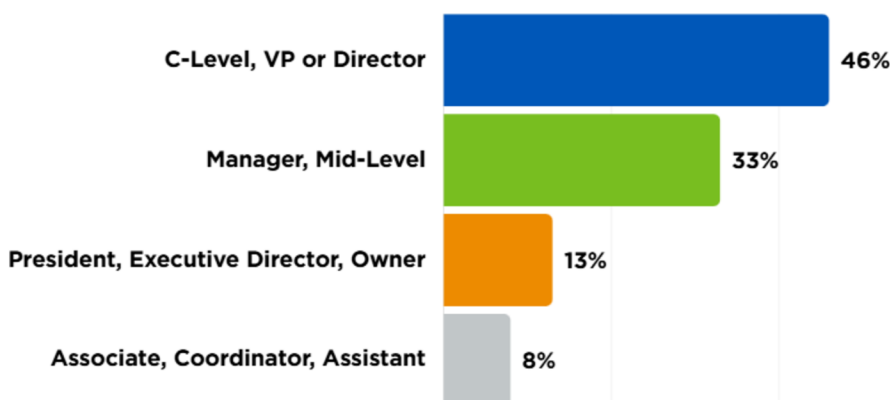

“ We got **exactly what we were looking for** out of this partnership all while **supporting capacity building** in the sector. ”
